

The animal-friendly climate change
in barns and riding stables

Rhenalux® regumatic

Easy controlling a healthy “work climate” with Rhenalux® regumatic

Climate of well-being for cows and horses.

The Rhenalux light ridge - the perfect lighting system for barns and riding stables. The constructional design provides for outstanding ventilation. By using the optional features of **Rhenalux® regumatic** ventilation will be under absolute control: efficient exhaust air regulation, adaptive climate control. No disturbing operating noise, no need for costly maintenance - in other words: animal-friendly and easy to handle.

Reliable, weather-proof, durable.

All **regumatic** system parts feature “long-term functionality”. The actuator is safely installed in the ridge. The aluminium shutters are absolutely non-corrosive - as are all the other components.

Manual or electric control.

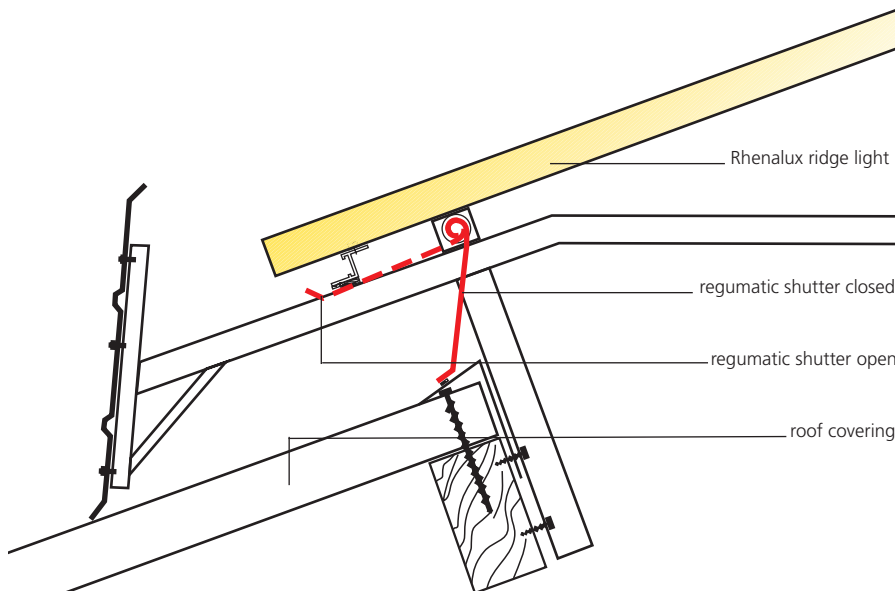

Operating modes are functional and reliable. Manual control for easy handling, electric control for ultimate convenience. The choice is yours!

Air exchange will always be guaranteed - whether new or existing buildings or reconstruction.

regumatic is the perfect choice for installation in new buildings. Retrofitting, however, e. g. during reconstruction of old buildings, is also possible at any time. The system will be adapted to any Rhenalux light ridge. Our specialists will be glad to advise you.

QUICK-CHECK

- Ventilation control as required
- Manual or electric operation
- Non-corrosive and maintenance-free system
- Compatible with all Rhenalux systems
